Formula for the final Grade Point Average (FGPA) Calculation

According to the GP obtained by the student, the GPA will be calculated as below;

$$GPA = \frac{\sum_i (C_i * GP)}{\sum_i C_i}$$

where C_i is the credit corresponding to the i^{th} subject, and GP the grade point of the final grade of that subject. The final GPA will be calculated as follows;

$$FGPA = \frac{\sum_j (STC_j * GPA_j)}{\sum_j STC_j}$$

where STC_j is the total number of credits for the j^{th} semester, and GPA_j the corresponding GPA for that semester.

(b) AWARD REQUIREMENTS

- A candidate must obtain at least "D" passes for all courses in each semester, securing a minimum FGPA of 2.0.
- Shall have obtained a minimum of 'C' grades for all four Land Surveying Practical subjects.
- Must have at least a 'C' grade for all of the compulsory subjects, including pre-requisites, in his/her area of specialization.
